

TotalSeal Secondary Wiper Seal TS 1500

BBB TANK SERVICES, INC.
FAST SERVICES AND NEW API TANKS

TotalSeal Secondary Wiper Seal—TS 1500

ADVANTAGES

1. Light weight construction.
2. Rapid installation.
3. Adds up to 20" of fill capacity.
4. Forms a vapor tight seal between the floating roof and tank shell wall.

DESIGN

Design criteria:

1. Double or single seal application.
2. Microcellular polyurethane elastomer.
3. Abrasion resistance.
4. High tensile strength and flexibility.
5. Excellent chemical resistance.
6. Made in the USA.
7. Light weight construction.
8. Designed for all types of tank applications.
9. An inexpensive seal system designed for high turn around tanks.
10. Used with aluminum and steel floating roofs.
11. Chemical resistance chart.

REGULATORY COMPLIANCE

BBB Tank Services' seals meet or exceed the allowable gap requirements set forth by the governmental and regulatory agencies throughout the United States. This design will show superior sealing ability throughout the roof travel; accounting for roof shifting, out of roundness, buckling, and the expansion and contraction requirement of each tank.

MATERIAL

Material depending on preference and needs of customer.
